To Whom It May Concern:

K-Love has impacted the lives of many people in our community by offering a **Rare** service aimed at families who don't want their children listening to music referring to violence, sex, drugs, or Satan, which most music is now aiming towards. Even the Country Music Industry has gotten worse, increasing the issue of drinking alcohol, sexual innuendoes, violence, etc. There are few local radio stations who offer music suitable for children or GOD fearing families. K Love offers a service for people who love wholesome music, and for those who wish to practice their religious rights by listening to music which doesn't offend their beliefs. K Love is a station who offers music to all Christians, which make up a very large percentage of US citizens. Although some people may not listen to or even know of K Love, it is so important to each listener throughout the US, that K Love manages to be supported by it's listeners year after year. That alone, should speak for itself of how important K Love is to us citizens. Sure, someone may want to start up another local station similar to K Love, but how will they be funded? Some cities, including Corpus Christi, TX, may not have enough listeners with enough money to keep these local stations funded. But with K Love, there are enough listeners worldwide with enough money to keep K Love running in different communities nationwide. On another note, not every city has investors interested in running a local station similar to K Love, and that would leave Christians and other families with moral standards with no choice of radio stations which they would listen to. I know this wouldn't be a direct violation of religious freedoms, but does impact it on a certain level by denying certain religions access to a radio station who serves their particular needs. Again, I'm aware of the idea that there could be local stations to replace it, but realistically, that seems highly unlikely. Please consider allowing national radio stations like K Love to remain on the air for local communities, like my own, who strive to listen to a radio station with moral values, sends positive messages, and has even saved lives. I don't know of many other radio stations who can say that they have actually saved peoples lives. Please don't take this away from us. Our nations morals are quickly degrading and we don't have much more to grasp onto. K Love is a rare station who manages to support our values and morals... one of the last hopes for our communities. Please consider keeping them available nationwide. I know the hundreds of listeners worldwide would appreciate it. Thank you for your time and consideration,

Sincerely,
Frank Rios II
